

## **ART provides comments to ICVCM**

ART has submitted [formal comments](#) to the Integrity Council for Voluntary Carbon Markets (ICVCM) on the Core Carbon Principles and draft Assessment Framework for ensuring carbon credit quality.

We recognize and appreciate the significant work that has gone into the development of the framework as well as the meaningful work ahead to provide constructive input to the process. We appreciate the opportunity to provide our feedback and thoughts on a pathway forward in coordination with the ICVCM Board, Secretariat and Expert Panel.

We firmly believe in the importance of ensuring the integrity of crediting systems and resulting emission reductions and removals credits in global carbon markets. We know how important this is for building confidence and scaling the market to contribute to Paris Agreement goals. We remain committed to dedicating time and effort to this important shared exercise.

We trust that the Board will carefully consider and reflect all input received when making decisions on the pathway to achieve the objectives of the ICVCM.
